

# Tilion

He is the steersman of the Moon, originally a hunter of Oromë's people, famed for his silver bow. After the Darkening of Valinor, Tilion was chosen by the Valar to become the pilot of the Moon. Now he steers the last flower of Telperion across the sky, though sometimes by uncertain paths. And although drawn to Arien he is ever burnt by her if he draws too close.

Famed for his silver bow
